The traditional culture of architecture and architectural education emphasizes individual and autonomous creativity, even in a profession that calls on collaboration and attention to community. We directly confront this culture, committing to advance collaboration, inclusion, and belonging, and to model a culture for the profession as well as the broader discipline of architecture. In addition to the actions listed below, we will focus on a plan to fully develop the Diversity, Equity and Inclusion (DEI) Action Plan that leverages the design process.

This multi-dimensional approach, called Design for Diversity, Design for Belonging, invites the participation of all members of our community. Using methods of architectural practice, from discussions and exhibitions to reviews and charrettes, we will design the path forward to mitigate bias and deeply embed DEI and Belonging into every aspect of our thinking and work.

“Good design is inclusive. It demonstrates a concern for the community. It produces buildings in which everyone feels welcome and comfortable. Given the global climate crisis, an architecture of the greater good is concerned about our shared environmental future...”

-Deborah Berke
